The data is unequivocal that Autopilot is safer than human driving by a significant margin. It is unethical and false of you to claim otherwise. In doing so, you are endangering the public.

As for the people you mention below, they have actively harassed and, in the case of Hothi, almost killed Tesla employees. What was a sideswipe when Hothi hit one of our people could easily have been a death with 6 inches of difference.

How can you possibly endorse this? You obviously couldn't care less about the truth.
